

## About Fulath

Fulath Factory was founded in 2007, as a qualitative forward step to the steel industry in Saudi Arabia, where the factory has been supplied with the most evolutionary & modern machines, and combined with a group of skilled workers, who work side by side with an Intelligent administration, to present one of the best factories in steel production with the highest quality possible and where SABIC &ldquo;Hadeed&rdquo; is the main supplier of the raw steel to the factory. We have an ambition to be the best of the industry in efficiency and productivity, and constantly push the frontiers in manufacturing processes service, as well as environment, safety and health measures. Our efforts, together with those of other equally sincere nationals, would certainly lead our beloved country to take its position among developed countries, both industrially and technologically.
